hm44

design: Alexander Taylor

Alexander Taylor's luxurious armchair is available in high-back and low-back configuration with either self-centering swivel base or with beech legs. Careful selection of foam grades and a flexible back support provide great comfort while retaining the sharp lines of the chair's dynamic form.

Internal frames are of beech with elasticated seat and back suspension; upholstery is of a graded CMHR polyurethane foams with a polyester wrap. The swivel pedestal is finished in a matt mid-grey epc; alternative beech legs are finished with a clear lacquer.

Seat height 350mm
